Subject: Historic water sample
[Texaco water sample.pdf](#)

Hello Jane,

Attached is the chemistry for the water sample collected from WD-1 in 1986 by Texaco that we discussed. The accompanying well information describes a perforated interval from 4875 to 5075 or approximately 25 feet above the top of the current injection zone (5,100 to 5,600 feet below ground surface) that is presented on page i of the executive summary for the Aquifer Exemption Application.

If you have any questions, please let me know.

Alan
